

MAAZ KHAN

maaz.khan20307@gmail.com | 03112940398 | Karachi, Pakistan | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate with industry experiences spanning data science, AI, full-stack development, and software quality assurance. Demonstrated ability to deliver enterprise-grade solutions in regulated environments including financial dashboards at Bank Islami, an ML forecasting system at 10Pearls, and a multi-role fintech platform with integrated payments, real-time systems, and AI capabilities. Proficient across the full development lifecycle from requirements and design through testing and deployment, with a strong foundation in database management, RESTful APIs, and data pipelines. Eager to contribute technical expertise and drive digital transformation within a banking environment.

EDUCATION

BS Computer Science — FAST-NUCES, Karachi

CGPA: 3.29 / 4.00

PROFESSIONAL EXPERIENCE

SQA Intern | Think Digitally — Karachi

March 2026 – June 2026

- Conducting end-to-end manual and functional testing of a law application covering test case design, execution, defect reporting, and bug tracking aligned with STLC.

Data Science Intern | 10Pearls — Karachi

Sept – Nov 2025

- Built a multi-horizon AQI forecasting system (Random Forest, Ridge Regression) deployed via Hopsworks with automated retraining pipelines, SHAP explainability, and a real-time Streamlit alerting dashboard.
- Engineered feature pipelines and managed model versioning on Hopsworks Feature Store ensuring reproducibility and scalable deployment.

Data & AI Intern | Bank Islami Pakistan Ltd. — Karachi

July – Aug 2025

- Designed interactive QlikView dashboards to visualize key financial metrics, enabling data-driven executive decision-making across the organization.
- Performed data cleaning, transformation, and validation across large financial datasets in a regulated banking environment, improving internal reporting accuracy.

KEY PROJECTS

TripVerse — AI Travel & Fintech Platform *NestJS · Next.js · PostgreSQL · Stripe · Gemini 2.5 Flash · Socket.IO · Duffel API*

- Engineered a full-stack multi-role platform (Client, Driver, Hotel Manager, Admin) unifying transport, hotel, and flight booking with Stripe payments, wallet management, commission tracking, and automated refunds — architecture directly applicable to core banking and fintech systems.
- Integrated Gemini 2.5 Flash as a context-aware AI travel assistant with real-time geospatial data, Cloud Vision monument recognition, dynamic surge pricing, Socket.IO live chat, 17 notification event types, and a hybrid AI-human dispute resolution workflow.

Automated Contract Risk Analysis

Python · Crew AI · Pinecone · LlamaParse

- Designed a multi-agent AI pipeline (Extractor → Analyst → Researcher → Critic) analysing freelance contracts across 10 legal risk categories with grounded, auditable outputs — applicable to compliance and document intelligence in financial institutions.
- Implemented a RAG pipeline using Pinecone vector DB and the CUAD legal dataset for semantic, precedent-based clause retrieval; used LlamaParse for structured ingestion of complex legal PDFs.

Car Bazaar — Full-Stack Marketplace

React.js · Node.js · Express · PostgreSQL

- Built a full-stack car marketplace with role-based access control, user authentication, ad posting, listing management, and an admin approval workflow.
- Designed a normalized PostgreSQL schema supporting multi-entity relationships; implemented input validation, secure form handling, and responsive UI with search and filtering.

T20 Cricket Outcome Predictor

Python · Scikit-Learn · Streamlit

- End-to-end ML pipeline on T20 World Cup data (2016–2024): 71.5% accuracy, AUC 0.77, MAE 21.9 runs; interactive Streamlit dashboard for real-time win probability and score predictions.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, C, C++

Data & AI: Scikit-Learn, Pandas, Random Forest, CrewAI, Gemini AI, SHAP, Pinecone, Hopsworks, QlikView, Streamlit

Development: Next.js, React.js, NestJS, Node.js, ASP.NET, REST APIs, PostgreSQL, MySQL, Prisma ORM, Socket.IO, Tailwind CSS

QA: Manual & API Testing, STLC, Jira, Postman, Azure DevOps, Selenium, Smoke Testing, Regression Testing, Sanity Testing

Tools: Git/GitHub, Linux
